PROFESSIONAL SUMMARY

Computer Science graduate with experience in Full Stack Development, Cybersecurity, and Data Analysis. Skilled in React, JavaScript, Python, SQL, Power BI, Tableau, and Burp Suite, with experience in responsive design and data-driven insights. Built real-time web applications, performed vulnerability assessments, and conducted exploratory data analysis during internships.

EDUCATION

S.G. Balekundri Institute of Technology Belgaum, India
Bachelor of Engineering in Computer Science | **CGPA: 7.94** 2026

Motichand Lengade Bharatesh Polytechnic Belgaum, India
Diploma in Computer Science | **CGPA: 8.82** 2023

SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS
Frameworks/Libraries: React.js, Node.js, Tailwind CSS
Data & Visualization: Power BI, Tableau, Excel
Cybersecurity: Burp Suite, Ethical Hacking, Pen Testing, HackTheBox
Tools/Platforms: Figma, Firebase, Git/GitHub

CERTIFICATIONS

Power BI – Microsoft Elevate	Dec 2025
Autonomous Database Cloud - Oracle	Nov 2025
Cloud Database Service – Oracle	Oct 2025
Python Programming – Tutodude	May 2025
Full Stack Web Development – Udemy	May 2023
Ethical Hacking – Udemy	Mar 2023

INTERNSHIP EXPERIENCE

Data Analytics Intern – Rooman Technologies Feb 2026 – May 2026 | Bangalore, India

- Completed structured training across the full data analytics lifecycle collection, cleaning, analysis, visualization, and decision-making.
- Practiced SQL for data extraction and analysis, including joins, subqueries, CTEs, and query optimization for real world analytics scenarios.
- Applied Python (NumPy, Pandas) for data cleaning, exploratory data analysis, and visualization (Matplotlib, Seaborn).
- Built interactive dashboards and DAX-based KPIs in Power BI, applying data modeling and storytelling techniques, while also exploring AI-assisted tools for EDA, report automation, and prompt engineering.

Data Visualization Trainee – Excelerate Aug 2025 – Sep 2025 | Remote

- Conducted collaborative data analysis with a cross functional virtual team to derive insights from real world datasets.
- Performed data cleaning, transformation, and exploratory analysis using statistical techniques to identify trends.
- Recognized as **Star Performer** for outstanding achievement during the internship.

Web Developer Intern – VaultofCodes Aug 2025 – Sep 2025 | Remote

- Built and deployed responsive web pages using HTML, CSS, and JavaScript, ensuring clean UI and smooth UX.
- Integrated front-end features and interactive elements to enhance website usability and engagement.
- Gained exposure to modern front-end frameworks like React and Tailwind through real-world development.

Cyber Security Intern – Eyesec CyberSecurity Pvt Ltd Mar 2023 – May 2023 | Belgaum, India

- Worked on real-world cybersecurity labs using HackTheBox.
- Gained hands-on experience with Burp Suite and vulnerability assessments.
- Gained exposure to network analysis tools such as **Wireshark**, and learned core exploitation and vulnerability discovery techniques.

PROJECTS

E-Commerce Sales Performance Dashboard with Cohort Analysis | Python, Power BI, DAX

- Built an interactive Power BI dashboard analyzing e-commerce sales data, incorporating Cohort Analysis to track customer retention and purchasing behavior over time.
- Used Python (NumPy, Pandas) to clean, transform, and prepare raw sales data for analysis and visualization.
- Designed KPIs and DAX-based metrics to surface business insights such as retention trends and revenue performance.
- Delivered a business-friendly, storytelling-driven report supporting data-informed decision-making.

CampusDrive – Bus Tracking Application | React.js, JavaScript, Firebase, OSRM API, Geolocation, Android

- Developed a role based app for students and drivers with live bus tracking, interactive maps, route visualization.
- Implemented real time GPS streaming using Geolocation API and Firebase Realtime Database, ETA per stop.
- Built in a fallback distance-calculation method to keep ETA accurate even when primary GPS-based tracking was unreliable, improving overall reliability of the system.
- Added an emergency alert module allowing drivers/admins to broadcast messages directly to students, alongside live status badges and stop-passed indicators; deployed as both a web app and Android application.

CyberScan - Web Application | JavaScript, REST APIs, Node.js

- Developed a full-stack web app to detect malicious URLs by aggregating data from multiple cybersecurity APIs.
- Implemented a threat analysis engine that computes risk scores and provides custom security recommendations.
- Built the frontend in **React.js** for a responsive scan interface, with a **Node.js** backend handling API integration and score computation.

ACTIVITIES

Aspire Leader Program – Aspire Institute (Harvard-founded)

- Selected for a global leadership development program focused on teamwork, mentorship, and professional growth
- Completed the Aspire Horizons Course, designed and delivered by Harvard faculty, focused on leadership in the age of digital transformation and AI.
- Completed a Personal & Professional Development module covering self-assessment, resume building, and networking strategies.

McKinsey Forward Program – McKinsey & Company

- Completed a 10-week program covering adaptability and resilience, structured problem-solving, and effective communication using McKinsey frameworks.
- Built skills in relationship building and collaborative teamwork, along with digital and AI literacy for modern workplace contexts.
- Engaged in self-paced digital courses and live virtual sessions led by McKinsey professionals, earning a McKinsey.org Forward digital badge.

Skilling Programs (AICTE-affiliated)

- AI & Cloud Technology – IBM SkillsBuild x Edunet Foundation | Sep–Oct 2025
- Front End Web Development – IBM SkillsBuild x Edunet Foundation | Aug–Sep 2025
- AI & Data Analytics (Green Skills) – Shell India x Edunet Foundation | Aug–Sep 2025
